Milton Quintero

Cybersecurity and networks
Guadalajara, Jalisco, Mexico

Summary

I am a cybersecurity student with hands-on experience in systems administration and networking.

Throughout my academic journey, I have worked with Red Hat Linux for infrastructure management and GNS3 for network emulation, I also have experience with relational databases using SQL and programming in C, Python, and Java.

I am expanding my knowledge in network administration and cryptography, while also gaining experience in penetration testing. I enjoy approaching problems with curiosity and persistence, which allows me to keep improving my skills in offensive aspects of cybersecurity.

Driven by genuine interest and proactivity, I am eager to contribute to projects that challenge me.

Experience

TP

Sales and customer service

May 2022 - July 2022 (3 months)

Guadalajara, Jalisco, Mexico

At TP, I handled customer support calls and used sales techniques to help keep customers satisfied. I took regular training to learn support tools and improve how I manage clients. I focused on clear communication to solve problems quickly in a hybrid work setup.

Education

ITESO Universidad Jesuita de Guadalajara

cybersecurity engineer · (August 2023 - December 2027)
